#WEARECONSERVATION

# Land Acknowledgement

The Niagara Peninsula watershed is situated within the traditional territory of the Haudenosaunee, Attiwonderonk (Neutral), and the Anishinaabeg, including the Mississaugas of the Credit—many of whom continue to live and work here today.

This territory is covered by the Upper Canada Treaties (No. 3, 4, and 381) and is within the land protected by the Dish with One Spoon Wampum agreement. Today, the watershed is home to many First Nations, Métis, and Inuit peoples.

Through the 2021-2031 Strategic Plan, we reconfirm our commitment to shared stewardship of natural resources and deep appreciation of Indigenous culture and history in the watershed.

# Awards of Merit - 2020

*The Award of Merit recognizes significant achievements and contributions by an individual, group, and business to improve and restore our local environment for the benefit of all watershed residents.*

## **KADEN WARREN:** YOUTH

Kaden is a student at Welland Centennial Secondary School, where he maintains a 90% average. His favourite subjects are math and science because he likes to learn about plants, animals, and ecosystems. Kaden loves to be outdoors in his free time – hiking, fishing, boating, and swimming. His passion and enthusiasm, combined with a strong work ethic, put Kaden apart while volunteering with the NPCA. He sought ways to do assigned tasks more efficiently while assisting with various community stewardship projects. Besides volunteering for the NPCA, Kaden also volunteers with Zehrs for Food Drives and Tim Hortons. During the pandemic, Kaden used his extra time to learn new skills and started his own business, Kaden's Abstract Aquarium, where he sells the abstract fish he makes from recycled materials like pop cans. Kaden would like to become an Ontario Conservation Officer to help protect natural resources for future generations to enjoy.

## **JOCELYN BAKER:** INDIVIDUAL

Jocelyn has worked in watershed conservation at the local community level for the past 30 years. She holds an undergraduate degree in Geography and Fine Art and a Water Resource Management degree. She recently completed a Masters in Sustainability Science. Jocelyn's early career focus was water quality improvement through implementing stewardship Best Management Practices, evolving into Great Lakes remediation and restoration project management. In addition to her current work as a researcher at Brock University under the UNESCO Canadian Chairs Program, Jocelyn is a full-time Professor at Niagara College in the School of Environmental Studies. Jocelyn is also the Canadian Co-Chair of the Niagara River Binational Ramsar Designation Steering Committee, working with community partners to secure a Wetland of International Importance (Ramsar Site) designation for the Niagara River. Jocelyn is a passionate advocate for conservation and has dedicated her career to improving and preserving the natural environment in Niagara.

## **MARCIE JACKLIN:** INDIVIDUAL

Marcie has been a birdwatcher for over 30 years, an environmental advocate, and a passionate conservationist. Through birdwatching, Marcie shares her knowledge and enthusiasm about the importance of wildlife conservation and environmental protection. Marcie is the Regional Coordinator for the Ontario Breeding Bird Atlas, a critical project undertaken every 20 years. She is also the president of Community Voices of Fort Erie, a member of Biodiversity and Climate Action Niagara, Canadian Co-Chair of the Birds on the Niagara bi-national festival, and the Chair of the Niagara Birding Conservation and Tourism Collaboration. In addition, Marcie has been a Council member of the Buffalo Ornithological Society, President of the Peninsula Field Naturalists, and Board of Directors for the Ontario Field Ornithologists. Marcie received the R.W. Sheppard Award from the Niagara Falls Nature Club in 2020 and the Canadian Wildlife Federation's Stan Hodgkiss Outdoorsperson of the Year Award in 2021.

# Awards of Merit - 2020

## **IAN SMITH:** INDIVIDUAL

Ian is a steward of the Niagara Region, instilling a strong sense of community in his students at Niagara College, understanding the role that environmental science and technology play in ensuring the health and vitality of local environmental systems. As an executive member and technical advisor of the Niagara Chapter of Trout Unlimited Canada (TUC), he has volunteered as a Fluvial Geomorphologist, Land Information Professional, Geographic Information Systems Specialist, and Educator to the cause to rehabilitate, restore, and inform on the cultural and natural heritage of the Niagara Region. Ian has contributed to the proposal, planning, design, and execution of TUC Niagara projects to improve the Twelve Mile Creek watershed. Ian has used innovative practices to reduce erosion, reduce entrenchment, and mitigate high temperatures, as well as provide and protect habitat to a variety of species, mainly the native Brook Trout, which is an indicator species of healthy and clean streams.

## **EARTH DAY HAMILTON BURLINGTON:** ORGANIZATION

Earth Day Hamilton-Burlington has been making every day Earth Day for over 30 years. They are an organization built on the idea that people who learn to love nature are likelier to want to protect it. They run educational festivals, tree planting events, waste workshops, community cleanups, and nature experiences for citizens and youth. Their goals are to create awareness, encourage positive action, provide accessible environmental programs, provide volunteer opportunities, and inspire the protection of the environment by connecting people with nature. Earth Day Hamilton-Burlington has run a tree planting event at Binbrook Conservation Area through the TD Tree Days grant, in partnership with the NPCA and the Glanbrook Conservation Committee, for the last six years. As a result, thousands of native trees and shrubs were planted, providing habitat and water quality improvement benefits for local wildlife and volunteering opportunities for the local community to connect to nature.

# Awards of Merit - 2021

**KERRY KENNEDY:** INDIVIDUAL

Kerry is a passionate and dedicated environmental educator, involved in numerous organizations, including Trout Unlimited – Niagara Chapter, where she worked enthusiastically on the Bring Back the Brookies program. Bring Back the Brookies is a hybrid online and field-centered environmental education program for grade 7-9 students.

She is the Past President of the Niagara Falls Nature Club, where she volunteers her time to lead hikes and outings, engage the community and attend local events. She is a valued member of the Birds on the Niagara Steering Committee and former Co-Chair of this bi-national event that aims to increase awareness about birding and birds on both sides of the Niagara River. She has volunteered to assist with Niagara Envirothon, planting events, and other educational programs. She has training in Ecosystem Restoration and a passion for turning her knowledge into programs and educational opportunities for future generations.

**KYRA SIMONE:** INDIVIDUAL

Kyra was born and raised in the Niagara Region and strongly advocated for environmental change and action. She writes a bi-weekly column called “Keeping it Green” for the local paper, the Lake Report, to raise awareness about environmental issues positively. Keeping it, Green is also a local community group run by Kyra to engage local volunteers in environmental initiatives like litter cleanups

in partnership with other organizations (A Greener Future, TerraCycle). She is a member of the Town of NOTL Environmental Advisory Committee, where she uses her role to bring critical environmental issues and concerns to the Council and staff in a positive and thoughtful way. She received the Lord Mayor’s Volunteer Award for her Environmental Efforts in 2021. Kyra holds a Bachelor of Science and two Masters in Biology and Science Communications and is currently enrolled in a Ph.D. program at the McMaster Ecohydrology lab.

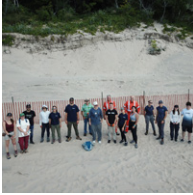

**LINDSAY TAYLOR:** INDIVIDUAL

In 2020, Lindsay founded ncStewards to connect the community through environmental stewardship opportunities. ncStewards represents a group of environmentally motivated Niagara College students that promote and engage in practices that further the objective of sustainability on campus and within the Niagara community. Throughout the pandemic, Lindsay recognized increasing

levels of eco-anxiety and created a virtual infrastructure, including a website and Instagram account to connect volunteer opportunities and promote environmental stewardship and conservation. Lindsay played a critical leadership role by coordinating volunteers and members of the St. Catharines Downtown Association’s Streetscape and Sustainability Committee and worked with Niagara College Indigenous Education to bring 14 pollinator gardens downtown. These gardens are filled with native species. Each plant is linked to a plant profile and Indigenous Teaching. Any visitor can learn more about these plants by viewing a QR code that includes information on the benefits of native plants and the importance of pollination.

# Awards of Merit - 2021

## **NIAGARA COASTAL COMMUNITY COLLABORATIVE:** ORGANIZATION

The Niagara Coastal Community Collaborative (Niagara Coastal) is committed to understanding and improving the health of the Great Lakes coastal zone in collaboration with NGOs, government, landowners, academia, and communities. They operate across the shorelines of the Great Lakes in the traditional territory of the Mississaugas, Haudenosaunee, Anishinaabe, and Neutral peoples.

Niagara Coastal works on three ecological priorities — nature-based shorelines, healthy beaches, and habitat and species. In addition, Niagara Coastal coordinates nature-based shoreline restoration, community-based water monitoring, the Visual Assessment Survey Tool (VAST), and knowledge brokering are some ways that Niagara Coastal partners with regional groups to conserve the Great Lakes. Since 2019, these collaborations have engaged over 500 volunteers in collecting 800 VAST surveys across 98 different sites, sharing 1,300 water quality samples with thousands of recreational water enthusiasts, and installing over 900 metres of sand fencing to help restore six hectares of sand dunes.

## **SPIRIT IN NIAGARA: SMALL BATCH DISTILLERS:** BUSINESS

Spirit in Niagara Small Batch Distillery was founded by Arnie Lepp, whose family has been farming for four generations. They care for over 200 acres of land and are the owner of the largest single-family tender fruit shipping company in Ontario, amalgamated from five other independent shippers. With 10% of Niagara tender fruits wasted annually, from over-ripened peaches to fallen or bruised plums, the

family made it their mission to reduce fruit waste. They do this by using fruit from their orchards that would be composted or too ripe to sell to create top-shelf fruit spirits that directly support farmers and families in the Niagara community. The distillery has also been built with other environmental initiatives, such as using the wastewater from their distillation process as green manure for fields and surrounding farms, allowing every stage of the fruit to be utilized rather than tossed away.

# Volunteers

Volunteers support the NPCA in many ways. They are ambassadors of our organization and are very valuable to our work. We are thankful that volunteers choose to spend their precious free time with us. Whether it is helping with educational programs, property maintenance and stewardship, or special projects and ecological restoration, volunteers and partners make a tremendous impact and help improve our watershed. When individuals come together to work on projects and programs that are important to them, they encourage others to do the same.

# Community Partners and Organizations

The NPCA is forever grateful for the community partnerships that are fundamental to the success of the work we do. We give thanks to the partners, community groups and organizations that have worked beside us throughout the years, and to the new partnerships that develop each year. When we work together, we achieve great results for the watershed, the community and for future generations!

# Niagara Peninsula Conservation Foundation

Founded in 1969, the Niagara Peninsula Conservation Foundation (NPCF) is a registered charity, dedicated to raising funds that aid in the conservation of our natural environment for present & future generations. When you donate to the Foundation (NPCF), you help support conservation projects and programs that contribute to improving our water quality, increasing green spaces, wetland and habitat restoration, and environmental research and education. For more info please visit [niagaraconservationfoundation.com](http://niagaraconservationfoundation.com)

The following members are the current NPCF Board of Directors:

**CHAIR TOM INSINNA**

**VICE CHAIR BARBARA GREENWOOD**

**TREASURER DONNA CRIDLAND**

**DIRECTOR MIKE BALSOM**

**DIRECTOR DIANA HUSON**
