

Ancilliary Information Map 2: Cumulative Abundance of Target Values

Explanatory Note:
This map shows the cumulative abundance, expressed by area, of targeted features found within a hexagon. Hexagons in shades of red contain a high abundance of features correlating with areas of interior forest that are only found within larger contiguous patches of forest cover. The information from this map can be readily used to inform priorities for conservation and stewardship actions.

- Legend**
- Baseline One Excluded
 - Waterbodies
 - Municipal Boundary
 - NPCA Jurisdiction
 - Extended Context Area Buffer
